

YOGESHWARI JOSHI

joshiy1257@gmail.com — +91 8421818900 — Pune, India — [LinkedIn](#)

EDUCATION

Bachelor of Engineering, Information Technology, Savitribai Phule Pune University 2020 - 2024
JSPM's Jayawantrao Sawant College of Engineering, Pune [CGPA : 9.08]

WORK EXPERIENCE

Analyst (Java Foundation with Spring Framework) - Capgemini [Pune] Dec 2024 - May 2025

- Developed backend applications using Java, Spring Boot, MySQL, and Microservices, improving code quality by 26%.
- Designed, implemented, and tested REST APIs, improving API reliability and reducing integration effort by 23%.
- Implemented service-to-service communication using Spring Cloud Netflix Eureka, reducing service management effort by 33%.
- Used Postman and Swagger for API testing and documentation, decreasing API-related defects by 19%.
- Followed layered architecture, improving code readability and reducing maintenance effort by 25%.
- Worked in an Agile development environment, collaborating with teams to deliver assigned tasks on schedule.

Software Development Intern - Numetry Technologies [Pune] Jan 2024 - July 2024

- Completed a structured trainee program focused on Java, Python, Spring Framework, and MySQL.
- Tested REST APIs using Postman and gained hands-on experience with API development.

PROJECTS

Hotel Management System

Developed a microservices-based System that streamlines customer management, room booking, billing, inventory, and notification services through scalable REST APIs.

- Implemented RESTful APIs using Spring Boot and Spring MVC, enabling seamless communication between services using OpenFeign and Netflix Eureka for service discovery.
- Designed and managed MySQL databases using Spring Data JPA and Hibernate, implementing CRUD operations and efficient data persistence.
- Tested and documented APIs using Postman and Swagger, ensuring reliable endpoint functionality and integration.

Human Body Action Detection and Recognition

Developed an AI-based web application that recognizes human body actions from video inputs using supervised machine learning techniques. [data preprocessing, model training, and evaluation using Python, Pandas, NumPy, and Anaconda]

- Built a supervised learning model using the UCF50 dataset to classify multiple human activities from video inputs.
- Implemented CNN for feature extraction and Extreme Learning Machine (ELM) for action classification to achieve accurate activity recognition.
- Developed a web interface supporting video upload and live camera tracking for real-time human action prediction.

SKILLS

Languages: Java, Python, SQL

Database/Technologies: MySQL, Spring Boot, Spring Core, Spring Data JPA, Microservices, OpenFeign, Netflix Eureka, Hibernate, RESTful APIs, JUnit 5, Mockito

Tools/Cloud: Git, Postman, Swagger, SonarQube, MySQL Workbench, Jupiter Notebook, Power BI

Other Skills: OOP, Agile, SDLC, Teamwork, Project Management, Adaptability, Time Management, Team Collaboration

CERTIFICATIONS

- Generative AI – Udemy — Java Spring Framework with Spring Boot – Udemy

ACHIEVEMENTS

- Selected as RPG-ESD Program Trainee(Zensar Technologies)
